OUR RANGE

Shower & bath screens

Foley Glass offers four main shower screen styles; **frameless, semi frameless, semi framed and fully framed**. Each screen is custom-made to suit your bathroom layout and personal style. Whether you're looking for sleek minimalism or practical durability, we'll help you find the right design for your home and budget.

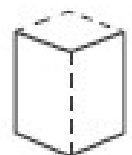

Frameless

Frameless shower screens are the ultimate in modern bathroom design. Featuring thick toughened glass and minimal hardware, they create a spacious, open look while showcasing clean lines and timeless simplicity.

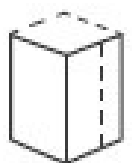

Semi Frameless

Semi frameless showers are framed around the outside perimeter only. All internal edges and doors are frameless. Semi frameless showers offer a clean, contemporary look and are a more affordable option compared to fully frameless.

Semi Framed

Semi-framed shower screens incorporate framing around the door and perimeter panels for strength and stability, while still maintaining a clean, contemporary appearance. A versatile option, they combine durability with affordability.

Framed

A framed shower screen has a frame around all the glass panels and the door, making it strong, stable and budget-friendly.

CONFIGURATION:

Fixed panel

A fixed panel shower screen configuration is a single panel of glass which offers open, walk in access to the shower.

Ideal for creating a clean look, or making smaller bathrooms appear larger. A fixed panel of glass can be frameless or framed.

Fixed panel frameless showers can also be customised with a curved top edge. This curve can have a radius of as much or as little as you like.

- Frame options: frameless or framed
- Glass types: clear, low iron, reeded, low iron reeded, acid etched, low iron acid etched and a selection of patterned glass
- Frame and hardware colours: see page 7 and 8

CONFIGURATION:

Front and return

A front and return shower screen features a front facing door and a return panel.

The return panel can be positioned on either side of the door. This type of shower screen works well in a corner space.

This configuration can be frameless, semi frameless, semi framed or framed.

- Door opening options: handle, knob, or polished hole
- Door style options: hinged, slider or pivot
- Glass types: clear, low iron, reeded, low iron reeded, acid etched, low iron acid etched and a selection of patterned glass
- Frame and hardware colours: see page 7 and 8

CONFIGURATION:

Front only

A front only design is a shower screen made up of a door and a fixed panel with no return.

This configuration can be frameless, semi frameless, semi framed or framed.

- Door opening options: handle, knob or polished hole
- Door options: hinged, slider or pivot
- Glass types: clear, low iron, reeded, low iron reeded, acid etched, low iron acid etched and a selection of patterned glass
- Frame and hardware colours: see page 7 and 8

CONFIGURATION:

Slider

Slider shower screens are designed for easy access with a sliding door opening and can be configured in a frameless, semi frameless or framed design.

In a frameless slider configuration, the glass door is attached with visible fittings on a top rail. In a semi-frameless design, the glass door fittings are concealed in the top section of the frame.

- Door opening options: handle, knob or polished hole
- Glass type: clear, low iron, reeded, low iron reeded, acid etched, low iron acid etched and a selection of patterned glass
- Frame and hardware colours: see page 7 and 8

CONFIGURATION:

Bath panel

Bath panels are perfect for shower and bath combinations.

Bath panels can be a single fixed panel, fixed and swing panel or a swing and swing configuration.

A bath panel can be frameless or framed.

- Glass types: clear, low iron, reeded, low iron reeded, acid etched, low iron acid etched and a selection of patterned glass
- Frame and hardware colours: see page 7 and 8
